

Operating Instructions

DT Forge exists to promote good craftsmanship in a rich variety of materials, using traditional hand crafting techniques, supplemented by modern tooling and processes. Products range from original designs in high quality materials to artefacts made by sensitive recycling of iconic objects with the aim of extending their lifespan.

“Making something out of the ordinary, out of the ordinary”

Model No. DDLBL-100

DT Forge - Vintage Blowlamps upcycled into a unique dimmable Desk, Table or Accent lights

Description

Vintage Blowlamps upcycled into a unique dimmable Desk, Table or Accent lights supplied complete with a flame tip bulb.

The inline dimmer switch enables the amount of light to vary from full brightness down to a gentle glow - excellent for 'mood' lighting.

Each blowlamp is stripped down to its separate parts before being cleaned, washed, buffed and polished. Parts are machined as required to accommodate fittings (e.g. boring out the Flame Tube to receive the light fitting and maintain good proportions) then reassembled to create the body of the lamp and fitted with all new 3-core electrics. The brass lamp fitting is fully earthed and the whole lamp earth continuity PAT tested.

Operating Instructions

- This table lamp is not a toy and not suitable for use by young children
- This lamp is only suitable for connection to a 240V~50Hz supply in accordance with current IEE Wiring Regulations. It is for moisture free, indoor use only, and not suitable for a bathroom location.

Safeguards and Precautions

- The lamp must be positioned on a stable, flat surface and kept away from flammable materials.
- To prevent damage to the mains cord, do not let it pass over sharp corners, edges or hot surfaces.
- Always unplug the lamp before inserting or replacing the bulb and when replacing allow time for the existing bulb to cool down.

- Under no circumstances must this lamp be covered with any material as this could pose a safety hazard.
- Don't let cables or plugs get wet, and keep liquids away from electrical appliances.

Assembly

- Stand the Lamp Base upright on a flat, stable surface and fit the bulb as supplied into the Lamp Holder.

Care and Maintenance

- When cleaning, unplug and allow to cool then clean surfaces with a soft dry cloth as needed.
- Ensure any metal polish residue is buffed and dried fully before reconnection.
- In the event of the mains cable becoming frayed or damaged it must only be replaced by a technically competent, qualified person. If you are in any doubt about your competence please consult a qualified electrician.
- The main body of the lamp base is recyclable at your local waste recycling centre and should not be added to normal domestic waste in order to make a contribution to environmental protection.
