

# KIDS CAN DO IT!

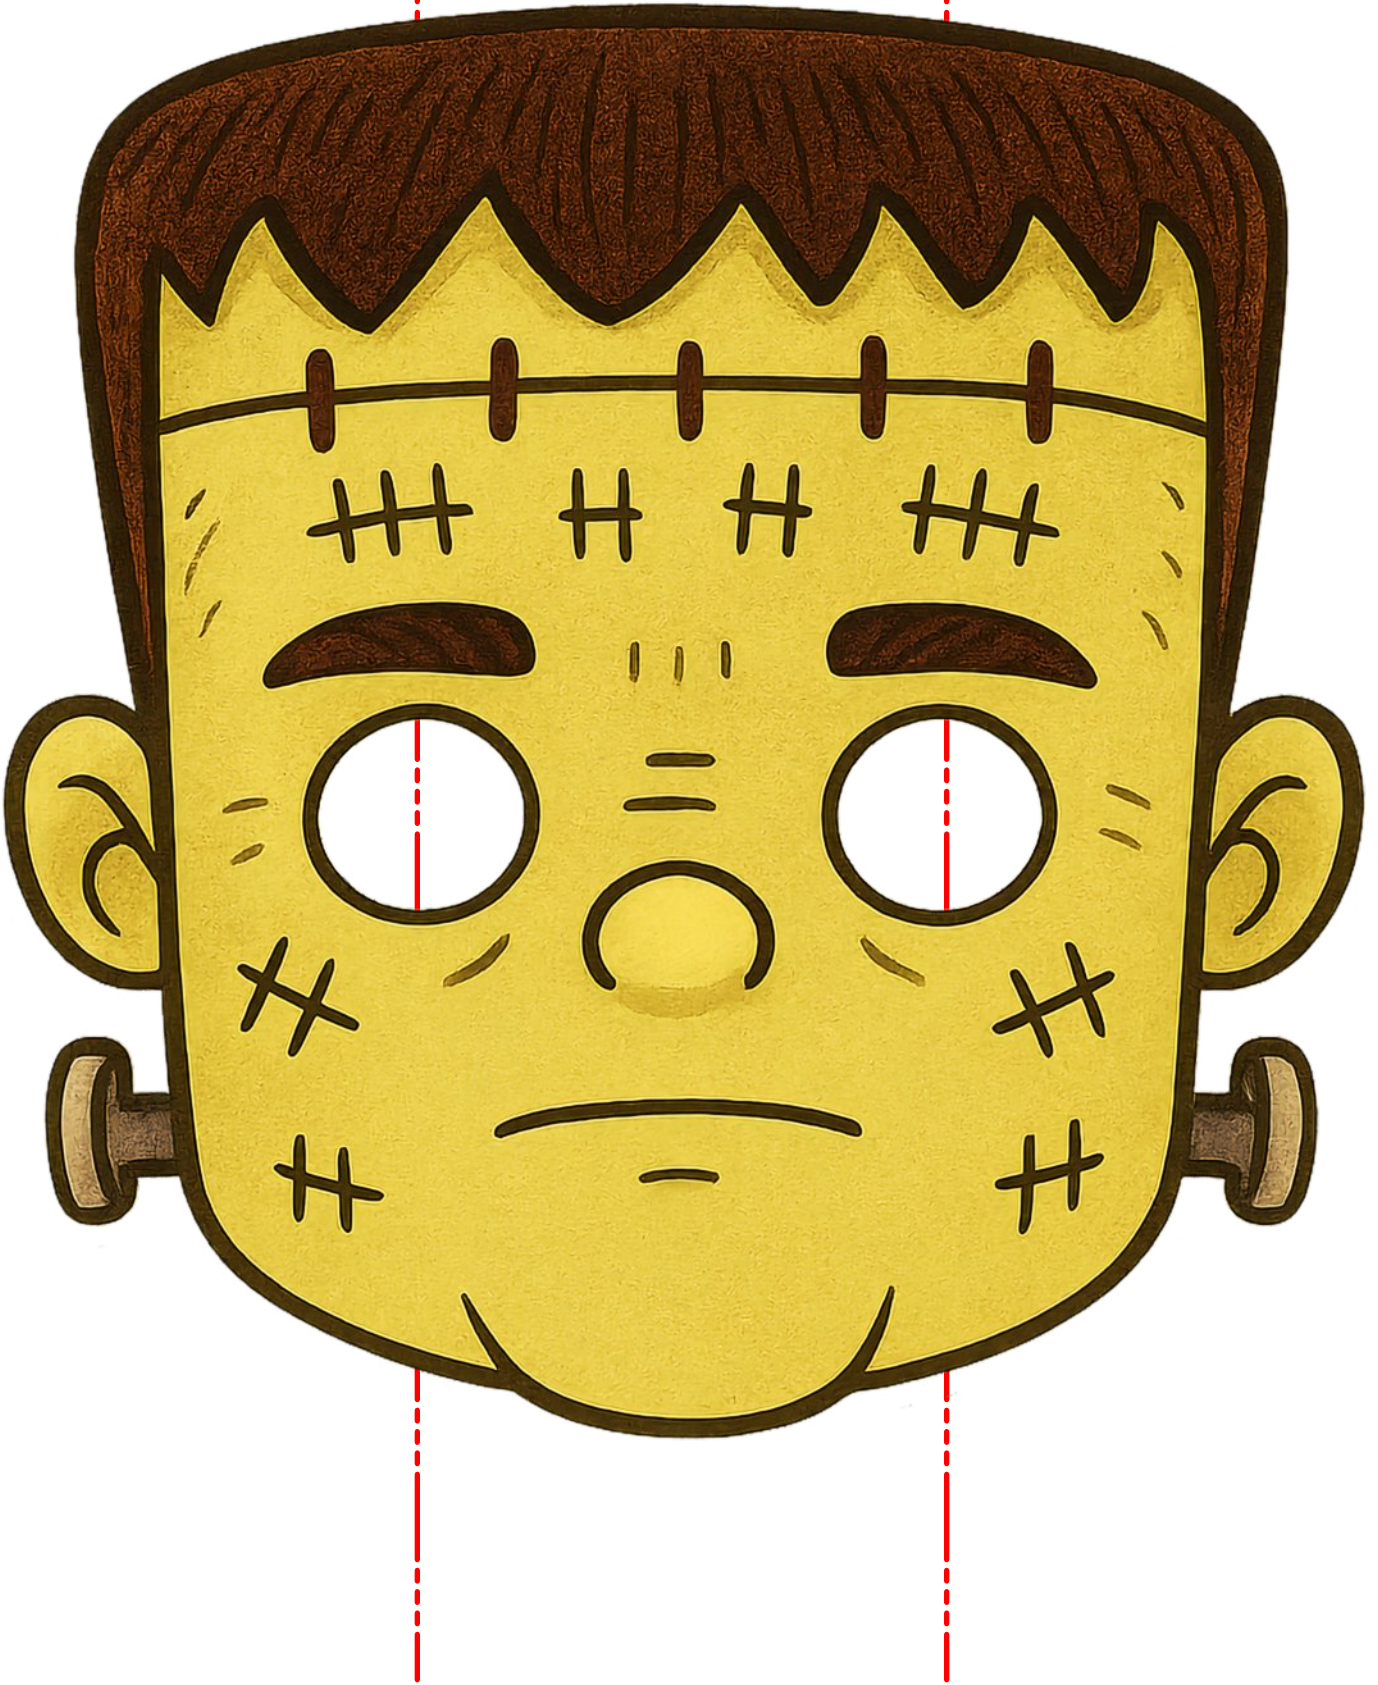

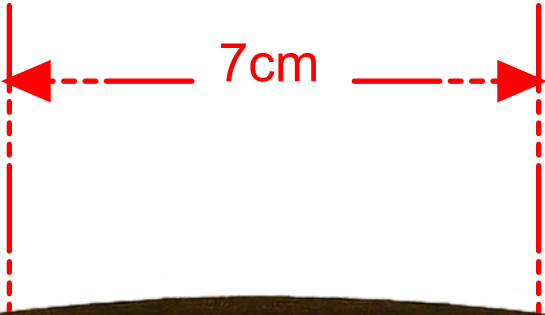

## Halloween Masks

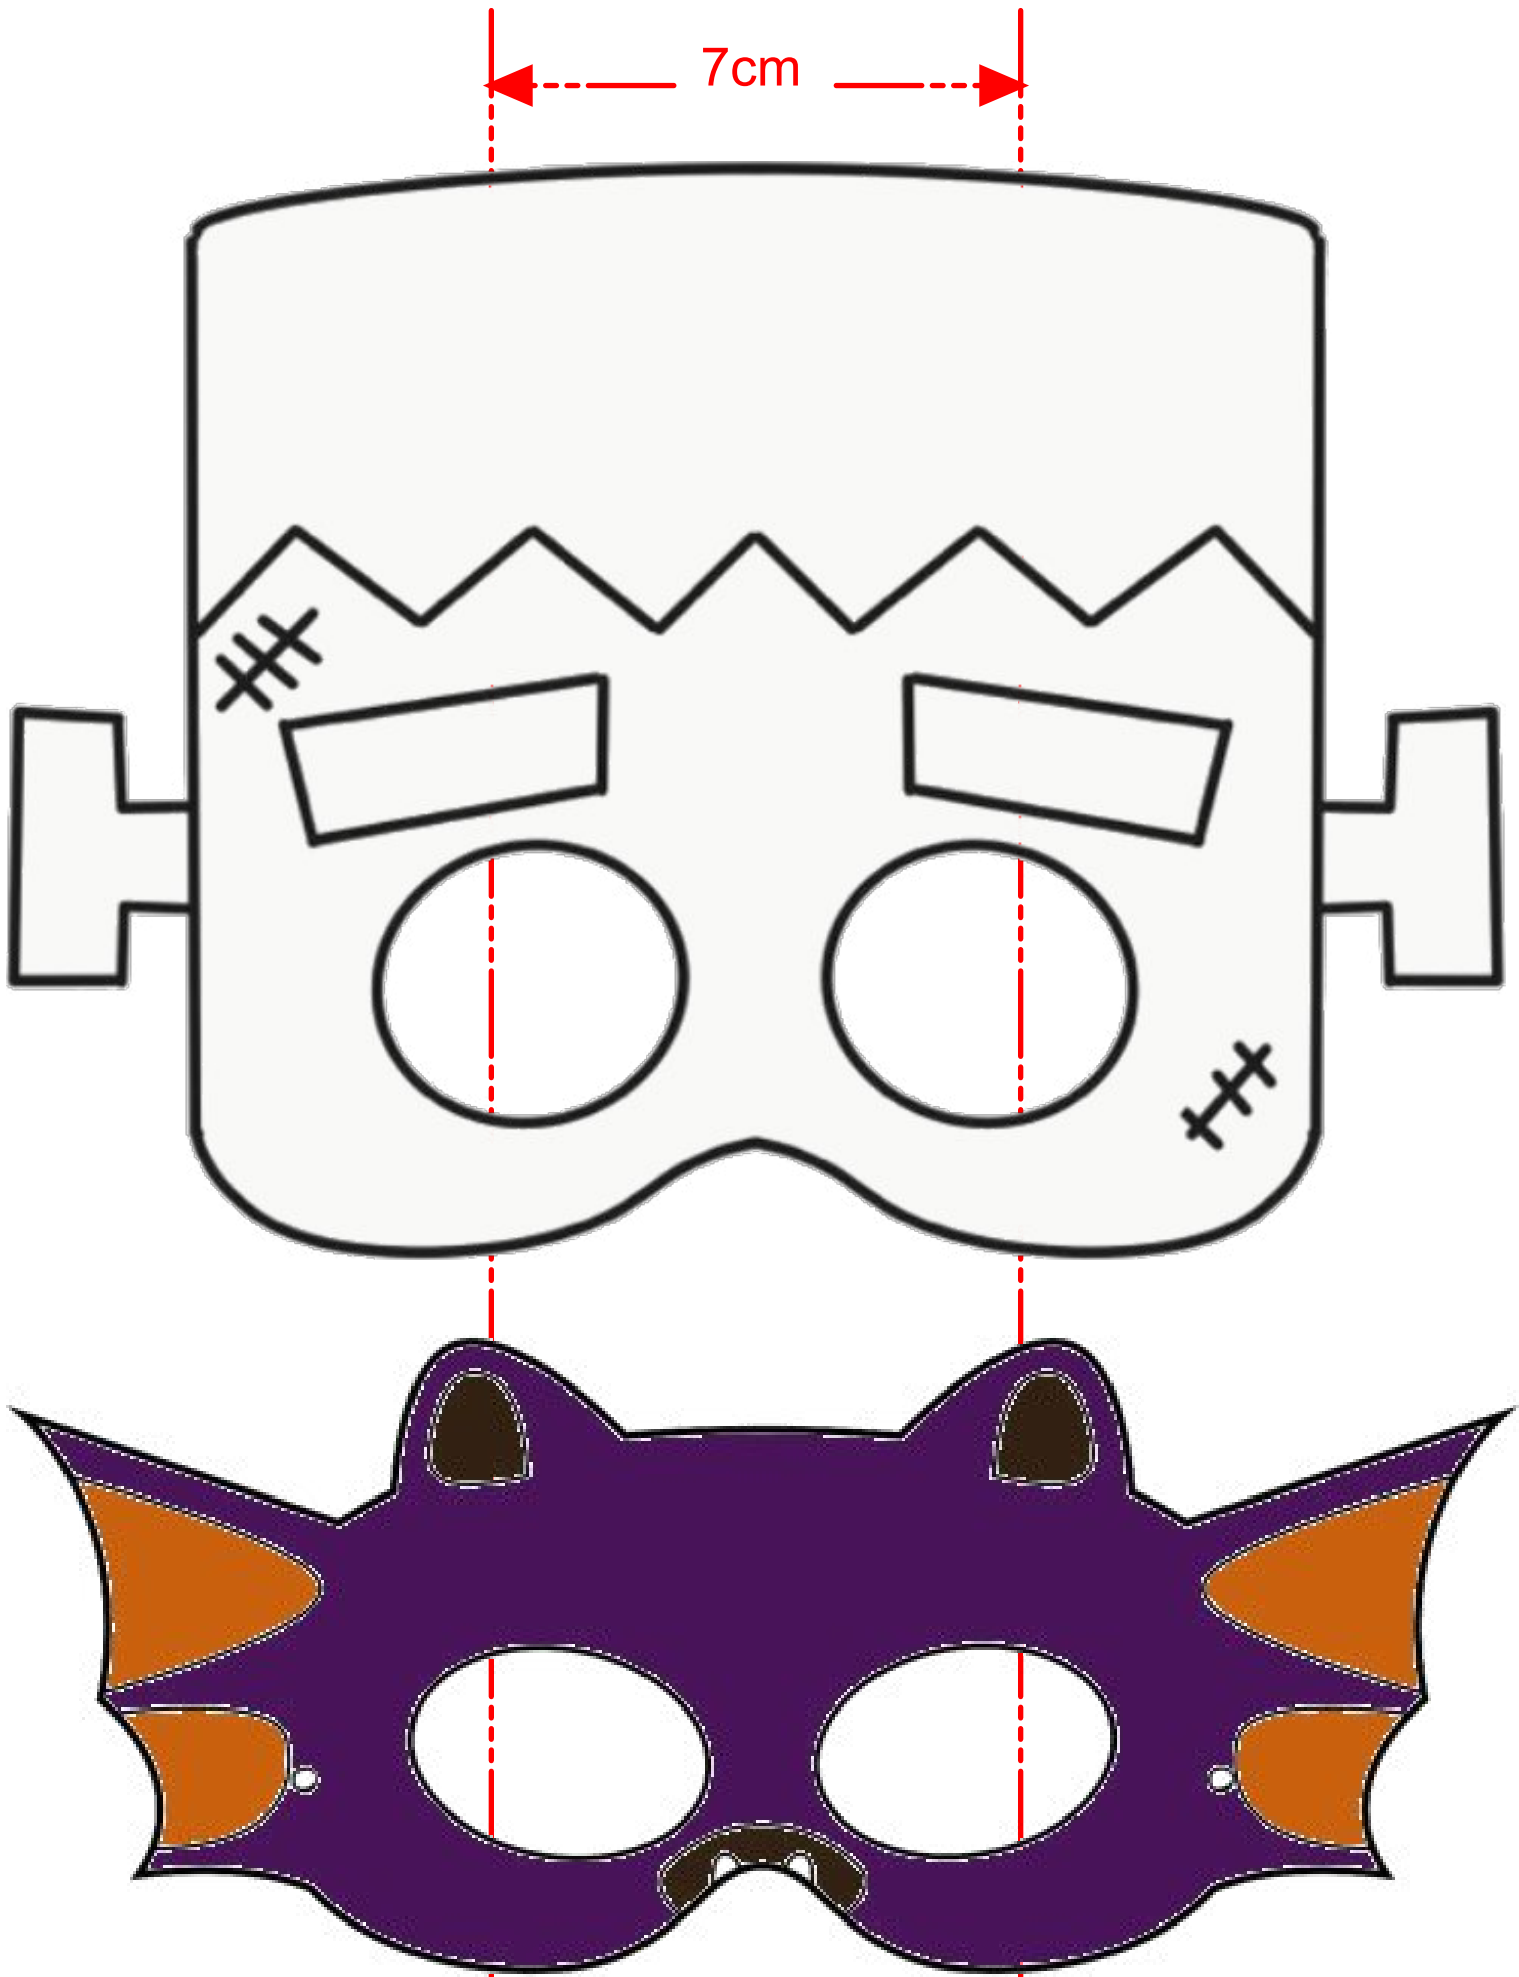

- Search Google images for suitable scary mask designs
- If needed, resize design to fit you (*i.e. centre of eyes should be about 7cm apart - ask someone to measure yours*)
- Print from computer, a full size mask on paper and use wallpaper paste to stick it onto card
- Alternatively, draw design directly into card and colour it in

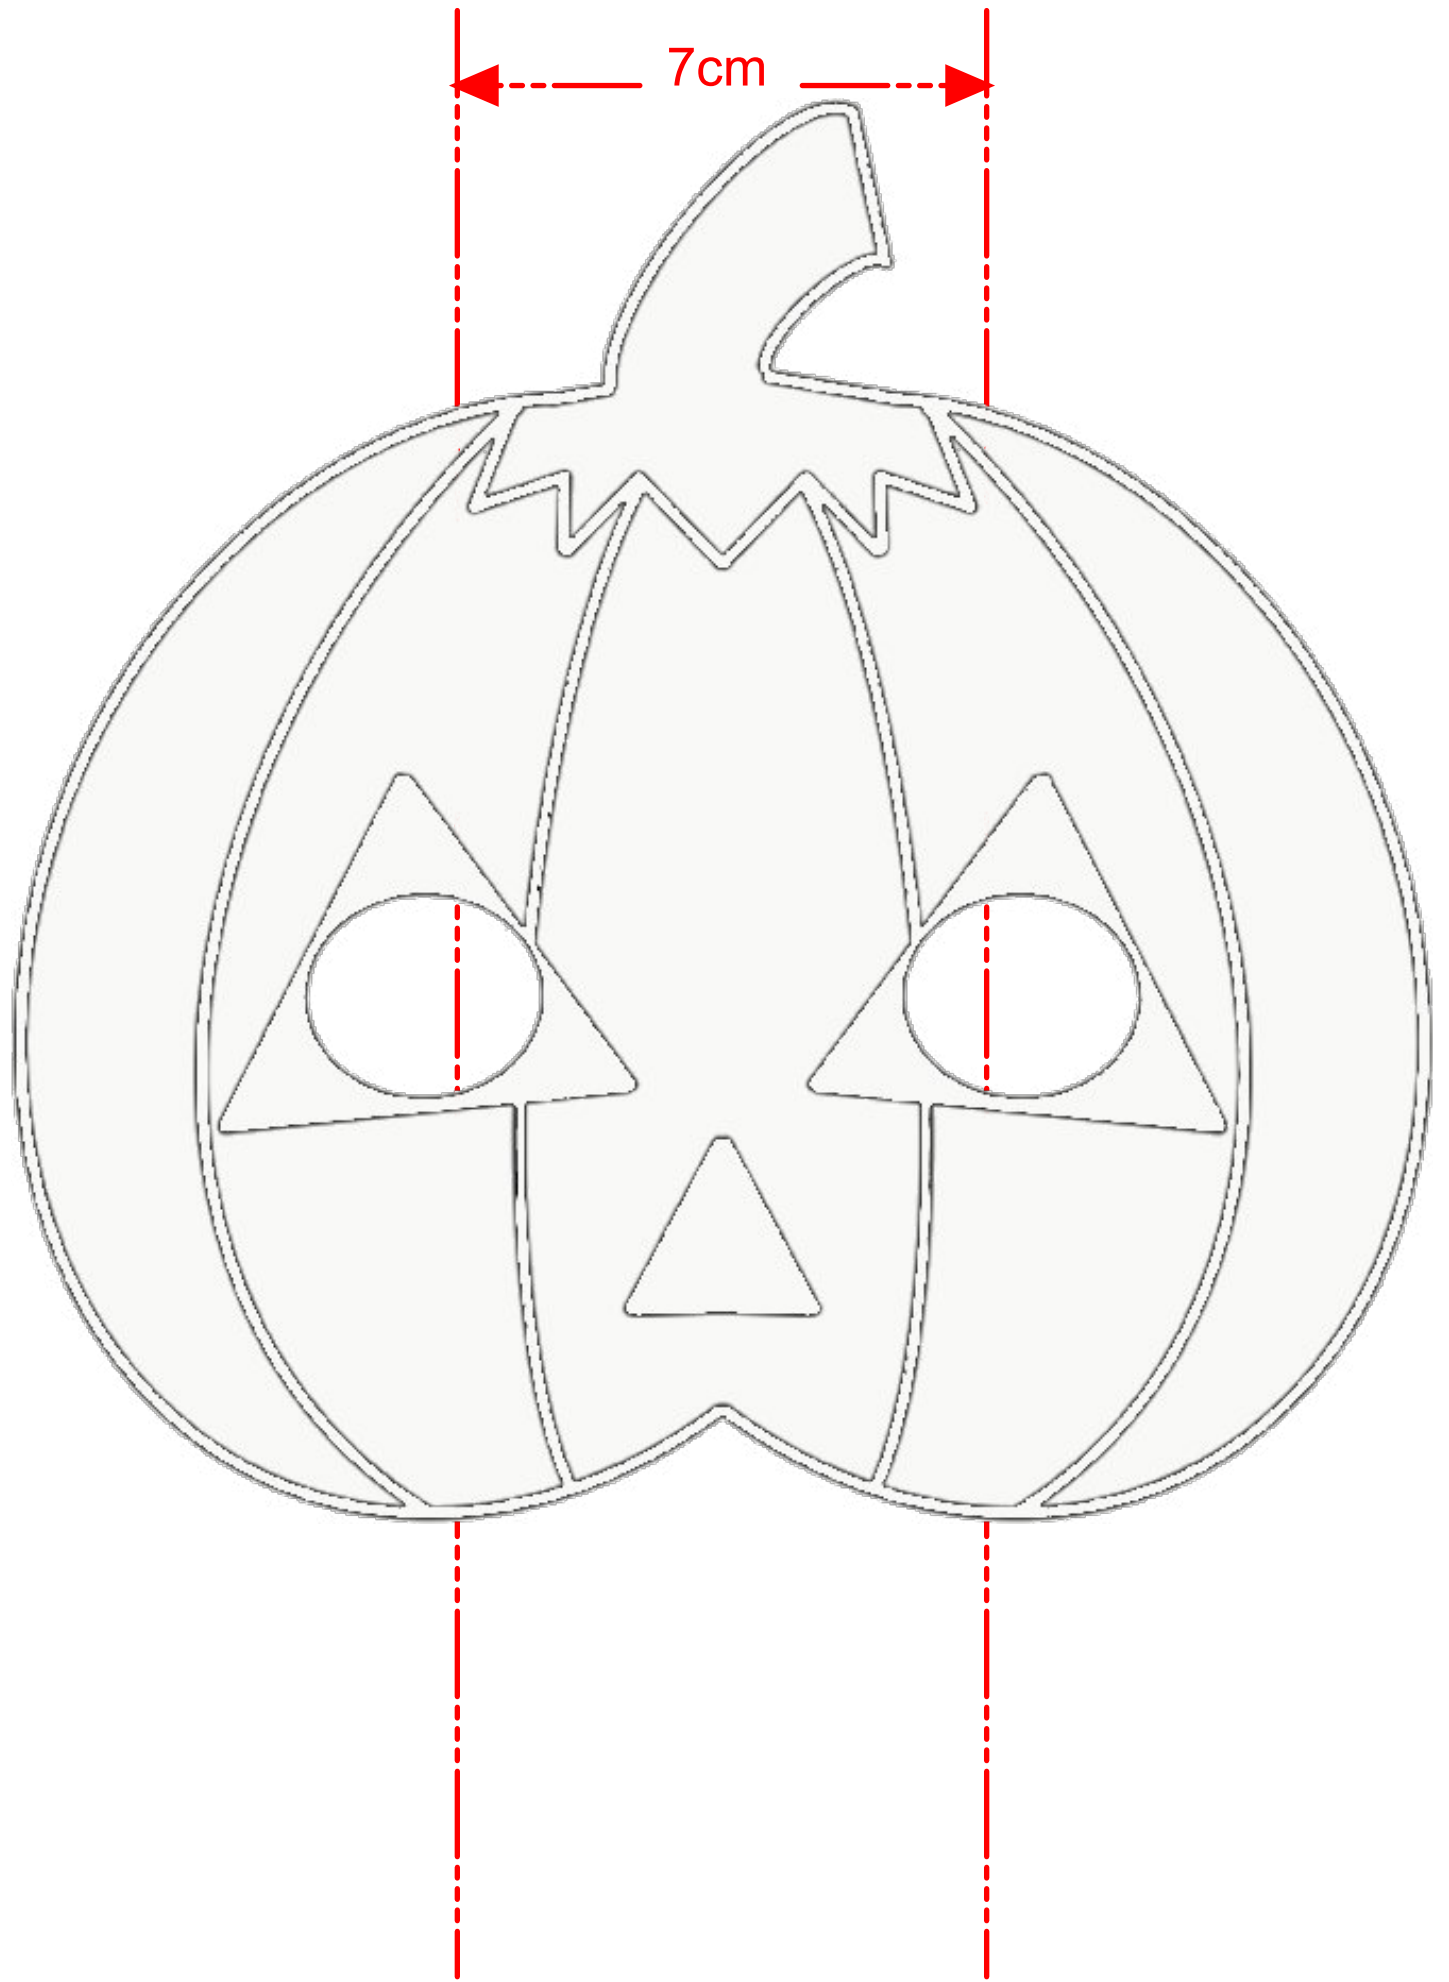

- Get help carefully to cut out holes for eyes or make sure there is a hole bigger than 13mm for the ChompSaw
- Get help with large scissors or, use ChompSaw, to cut out the mask outline
- Use paper punch to make small holes, or use stapler, to tie or fix elastic cord or string to hold mask in place
